

Johnsonite®

Adhesive Quick Reference

The Adhesive Quick Reference is designed to simplify the product selection process and provides a synopsis of the adhesives available in the Johnsonite product line. For complete application, installations, and material safety data information, refer to the tabbed section of the specific adhesive.

#522 - Seam Sealer

A translucent adhesive/sealing compound specifically formulated for the seam sealing of Johnsonite Rubber and Vinyl Flooring products and accessories to most clean, dry, porous and non-porous interior floor surfaces where a water-resistant or sanitary condition is required. It is available in an 8 oz. squeeze bottle for ease of installation.

#905 - Releasable Adhesive

A light-colored, nonflammable, non-staining, solvent-free, acrylic-based adhesive specifically formulated for the temporary or accessible installation of Johnsonite Rubber Floor Tiles and ComforTech Rubber Sheet Flooring to most clean, dry, porous and nonporous interior floor surfaces.

#930 - Two-Part Epoxy Caulking Compound

A solvent-free compound designed specifically to prevent the flexing and premature cracking of rubber and vinyl stair treads and nosings. This product is applied in the nose of the product, prior to installation, and when uniformly molded fills any voids or gaps between the internal nose angle of the product and step edge, developing a strong bonding support between the two surfaces. The compound can be used to repair cracks, holes, depressions, and worn or broken edges on wooden, concrete, or metal stairs.

#945 - Contact Bond Adhesive

A nonflammable, solvent-free, neoprene latex based contact adhesive developed for the installation of Johnsonite Resilient Mouldings. It produces a high-strength, water resistant bond immediately upon contact.

#960 - Acrylic Cove Base Adhesive

A nonflammable, solvent-free, water-based, acrylic adhesive for the installation of Johnsonite Rubber and Vinyl Wall Base products to most clean and dry, porous interior wall surfaces. The wall surfaces may be interior plaster, gypsum wall board, unpainted concrete, masonry, mineral-reinforced cement board or other similar porous surfaces.

#965 - Flooring and Tread Adhesive

Johnsonite #965 Flooring and Tread Adhesive is a high-strength, solvent-free, water based latex adhesive specifically formulated for the installation of Johnsonite Roundel Rubber Floor Tiles, ComforTech Rubber Sheet Flooring, and Rubber or Vinyl Stair Treads and Nosings on porous or non-porous interior floor surfaces

#975 - Two-Part Urethane Adhesive

A nonflammable, solvent-free adhesive developed for the installation of Johnsonite Rubber Floor Tiles, ComforTech Rubber Sheet Flooring, and Rubber and Vinyl Stair Treads and Nosings to most clean, dry, porous and nonporous interior floor surfaces.

#986 - Terra-Turf Adhesive

A nonflammable adhesive specifically developed for the installation of Johnsonite Terra-Turf Rubber Floor Tiles to most clean, dry, porous and nonporous interior and exterior floor surfaces.

#996 - Two-Part Epoxy Adhesive

A nonflammable, solvent-free adhesive for the installation of Johnsonite Rubber Floor Tiles, ComforTech Rubber Sheet Flooring, and Rubber and Vinyl Stair Treads and Nosings to most dry, clean, porous and nonporous interior floor and stair surfaces.
