

A butterfly lives a season. Our Color Foundations™ neutrals live forever.

You don't want to build a design around a neutral spec, which may have a life span of a season or two. That's why we created Color Foundations. Six core neutral palettes with choices guaranteed to always be available across every product we make: rubber, vinyl, linoleum, finishing borders (wall base), stair treads and accessories. To see our whole color story, visit [johnsonite.com](http://johnsonite.com). You'll find all the tools you need to create designs that positively impact the performance of the people who use the space.
