HARMONIUM xf LINOLEUM

PERFORMANCE

Linoleum has re-emerged on the design scene, striking a natural balance between sustainability and organizational goals. So much so that most linoleum sold in the U.S. is installed in the commercial market. Which makes linoleum a poster child for **Balanced Choice**.

Our linoleum collection, Harmonium xf, offers you the ultimate balancing act. It's truly sustainable. Made from naturally renewable materials such as linseed oil, cork, wood and limestone, it's naturally bacteriostatic, biodegradable and fire retardant.

But it also offers lots of aesthetic choices – rich new colors and patterns, even custom color designs. Which are showing up in some of the world's most aesthetically pleasing corporate, healthcare and education environments.

To balance it all off, Harmonium xf offers a low life-cycle cost lasting 30, even 40 years. And it looks good with little effort, thanks to our proprietary xf™ Finish. Our Harmonium xf requires no initial waxing and polishing, and saves most end-users on maintenance.

As just one part of a complete system that includes finishing borders (wall base), stairwell solutions and accessories, Harmonium xf works in harmony with others, bringing sustainability and aesthetics into balance to create a lifetime return. **Balanced Choice** at its best.
