Environmental Fact Sheet

Where we can use natural, renewable resources, we do.

Using fewer resources is good for the environment and the bottom line.

We make floors that help people work, play, shop, heal and learn better.

We use more recycled content at the start and recycle more product at the end.

Space™

Space™ modular resilient tiles are part of a system that balances impact across people, the environment and the bottom line. Our goal is to develop solutions that use better materials, practice resource stewardship, and create people-friendly spaces while maximizing reused and recycled content.

BETTER RAW MATERIALS

Space modular resilient tiles are manufactured using the most environmentally responsible materials possible while assuring consistency in quality and performance. We use local suppliers as often as we can, to reduce the environmental impact from transportation.

- Based on up to 57% natural raw materials, such as mineral fillers

RESOURCE STEWARDSHIP

Space tiles are produced in Sedan, France. The factory applies an environmental management system (ISO 14001) and over the last five years has made numerous improvements:

- Realized 63% reduction in water consumption
- Achieved a 29% reduction in VOC emissions to the air
- Accomplished a 133% increase in recycled material (sent to our plant in Lentzweiler for recycling) since 2003.

PEOPLE-FRIENDLY SPACES

One of our core beliefs is that people are happiest when they are offered choices that help them balance their needs and stay true to their values. Space modular resilient tiles deliver valuable health, hygiene and welfare benefits:

- The PUR surface treatment reduces the use of water, detergent and chemicals, and ensures easy and low cost cleaning and maintenance.
- Reduces the use of water, detergent and chemicals, and ensures easy and low-cost cleaning and maintenance.
- Sanitized® treatment for anti-bacterial properties that support good hygiene
- The modular system allows for the floor to be quickly and easily replaced, causing minimal disruption in workspace.
- FloorScore™ certified for good indoor air quality.

REUSE AND RECYCLE

- Space modular resilient tiles contain up to 35% pre-consumer recycled content
- Tiles can be installed with releasable adhesive for repurposing in other areas.
- All samples can be reclaimed and repurposed as part of our ReStart® Reclamation Program
- ReStart allows installers to send back unused or cut material for recycling.

ISO 14001 certificate no. SM/2008/32992, ISO 9001 certificate no. SM/2008/32992, OHSAS 18001 certificate no. SM/2008/32992
