

# Environmental Fact Sheet

Where we can use natural, renewable resources, we do.

Using fewer resources is good for the environment and the bottom line.

We make floors that help people work, play, shop, heal and learn better.

We use more recycled content at the start and recycle more product at the end.

## Solid Vinyl Tile (SVT)

Azrock's Solid Vinyl Tile (SVT) is part of a system that was designed with people, the environment and the bottom line in mind. When we use better materials, practice resource stewardship and create people-friendly spaces while maximizing reused and recycled material in our flooring, we create a flooring solution that provides the ultimate flooring experience.

### BETTER RAW MATERIALS

SVT is manufactured in a facility that received ISO 9001 and ISO 14001 Certification for Quality Management of its manufacturing processes.

- Contains 60% natural materials, such as limestone

### RESOURCE STEWARDSHIP

SVT is produced in Florence, Alabama. This facility practices environmental initiatives that include:

- Energy reduction initiatives that achieve annual reductions in electricity and natural gas usage
- All product lines are closed-loop and offer maximum efficiency in production

### PEOPLE-FRIENDLY SPACES

One of our core beliefs is that people are happiest when they are offered choices that help them balance their needs and stay true to their values.

- FloorScore™ certified as low emitting products for good indoor air quality
- Reduces slip and fall injuries with slip-resistant surfaces on select Achieve tiles
- Offers appealing aesthetic through a large variety of color, design and large format options
- SVT can be maintained in some applications without the use of floor strippers and finishes.
- Experience a minimum of 90% reduction and savings of floor strippers and polishes

### REUSE AND RECYCLE

- SVT contains up to 3% post-consumer recycled content.
- All samples, unused installation material and used flooring is reclaimed and recycled through our ReStart® Reclamation Program.
- SVT is manufactured in our Florence plant where production waste is either reworked into future tile or incorporated into residential tile, almost eliminating production waste.
- Tarkett's Florence plant utilizes pre-consumer recycled material from a number of outside sources.

ISO 14001 certificate no. US00011659, ISO 9001 certificate no. US00011675
