#### Human Life-Safety

Comfortable underfoot and slip resistant

#### Return on Investment

Easy to clean, no waxing required

.....  
Reduced water, detergent and energy costs

# Environmental Fact Sheet

Where we can use natural, renewable resources, we do.

Using fewer resources is good for the environment and the bottom line.

We make floors that help people work, play, shop, heal and learn better.

We use more recycled content at the start and recycle more product at the end.

# Replay

Replay Multi-Functional and Sports Rubber Tiles and Rolls are part of a system that balances impact across people, the environment and the bottom line. Our goal is to develop solutions that use better materials, practice resource stewardship, and create people-friendly spaces while maximizing reused and recycled content.

## BETTER RAW MATERIALS

Replay Multi-Functional and Sports Rubber Tiles and Rolls are manufactured using mostly post-consumer materials (rubber tires) while assuring consistency in quality and performance.

- Minimum number of raw material supplier sources enables better consistency in quality and formulation, resulting in less waste and energy usage.
- All raw materials undergo testing at the supplier and at the factory before use to ensure every product meets stringent specifications.

## RESOURCE STEWARDSHIP

Replay Multi-Functional and Sports Rubber Tiles and Rolls are manufactured in Colton, CA, by the state's largest single user of waste tire crumb rubber.

- Off specification batches are reprocessed during manufacturing to prevent waste.

## PEOPLE-FRIENDLY SPACES

One of our core beliefs is that people are happiest when they are offered choices that help them balance their needs and stay true to their values.

- Naturally slip-resistant floors help to reduce slip/trip-and-fall accidents.
- Shock and sound absorption for added comfort.
- Environmentally responsible, no-wax maintenance program means no finishing chemicals to enter the waste stream.

## REUSE AND RECYCLE

- Raw material excess is captured for manufacture.
- Scrap and off-spec material product is sold for other uses.
- Replay is manufactured with an average of 92% post-consumer, rubber tire crumb material and 7% rapidly renewable resources.
- Interlocking tiles can be installed without adhesive for repurposing in other areas.
- No production lots means that waste and scrap material are reduced through supply chain.

ISO 14001, ISO 9001 certification no. A-636
