Reduced water, detergent and energy costs

Environmental Fact Sheet

Where we can use natural, renewable resources, we do.

Using fewer resources is good for the environment and the bottom line.

We make floors that help people work, play, shop, heal and learn better.

We use more recycled content at the start and recycle more product at the end.

Training®

Training® Multi-Functional and Sports Flooring is part of a system that balances impact across people, the environment and the bottom line. Our goal is to develop solutions that use better materials, practice resource stewardship, and create people-friendly spaces while maximizing reused and recycled content.

BETTER RAW MATERIALS

Training is manufactured using the most environmentally responsible materials possible while assuring consistency in quality and performance. We use local suppliers as often as we can, to reduce the environmental impact from transportation.

- Based on up to 53% natural raw materials, such as mineral fillers

RESOURCE STEWARDSHIP

Training is produced in Sedan, France. The factory applies an environmental management system (ISO 14001) and over the last five years has made numerous improvements:

- Realized 63% reduction in water consumption
- Achieved a 29% reduction in VOC emissions to the air
- Accomplished a 133% increase in recycled material (sent to our plant in Lentzweiler for recycling) since 2003.

PEOPLE-FRIENDLY SPACES

One of our core beliefs is that people are happiest when they are offered choices that help them balance their needs and stay true to their values. Training delivers valuable health, hygiene and welfare benefits:

- The PUR surface treatment reduces the water, detergent and chemicals, and ensures easy and low cost cleaning and maintenance.
- Reduces the use of water, detergent and chemicals, and ensures easy and low-cost cleaning and maintenance.
- FloorScore™ certified for good indoor air quality.
- Sanitized® treatment for anti-bacterial properties that support good hygiene

REUSE AND RECYCLE

- Training contains up to 22% pre-consumer recycled content.
- All samples can be reclaimed and repurposed as part of our ReStart® Reclamation Program.
- ReStart allows installers to send back unused or cut material for recycling.

ISO 14001 certificate no. SM/2008/32992, ISO 9001 certificate no. SM/2008/32992, OHSAS 18001 certificate no. SM/2008/32992
